Section D – Risks

D.2	Key information on the key risks that are specific to the Issuer	<p>Credit Risk: The Issuer is exposed to the risk of suffering loss if any of its customers, clients or market counterparties fails to fulfil its contractual obligations. The Issuer may also suffer loss where the downgrading of an entity's credit rating causes a fall in the value of the Issuer's investment in that entity's financial instruments.</p> <p>Weak or deteriorating economic conditions negatively impact these counterparty and credit-related risks. In recent times, the economic environment in the Issuer's main business markets (being Europe and the United States) have been marked by generally weaker than expected growth, increased unemployment, depressed housing prices, reduced business confidence, rising inflation and contracting GDP. Operations in the Eurozone remain affected by the ongoing sovereign debt crisis, the stresses being exerted on the financial system and the risk that one or more countries may exit the Euro. The current absence of a predetermined mechanism for a member state to exit the Euro means that it is not possible to predict the outcome of such an event and to accurately quantify the impact of such event on the Issuer's profitability, liquidity and capital. If some or all of these conditions persist or worsen, they may have a material adverse effect on the Issuer's operations, financial condition and prospects.</p> <p>Market risk: The Issuer may suffer financial loss if the Issuer is unable to adequately hedge its balance sheet. This could occur as a result of low market liquidity levels, or if there are unexpected or volatile changes in interest rates, credit spreads, commodity prices, equity prices and/or foreign exchange rates.</p> <p>Liquidity risk: The Issuer is exposed to the risk that it may be unable to meet its obligations as they fall due as a result of a sudden, and potentially protracted, increase in net cash outflows. These outflows could be principally through customer withdrawals, wholesale counterparties removing financing, collateral posting requirements or loan draw-downs.</p> <p>Capital risk: The Issuer may be unable to maintain appropriate capital ratios, which could lead to: (i) an inability to support business activity; (ii) a failure to meet regulatory requirements; and/or (iii) credit ratings downgrades. Increased regulatory capital requirements and changes to what constitutes capital may constrain the Issuer's planned activities and could increase costs and contribute to adverse impacts on the Issuer's earnings.</p> <p>Legal and Regulatory-related risk: Non-compliance by the Issuer with applicable laws, regulations and codes relevant to the financial services industry could lead to fines, public reprimands, damage to reputation, increased prudential requirements, enforced suspension of operations or, in extreme cases, withdrawal of authorisations to operate.</p> <p>Reputation Risk: Reputational damage reduces – directly or indirectly – the attractiveness of the Issuer to stakeholders and may lead to negative publicity, loss of revenue, litigation, regulatory or legislative action, loss of existing or potential client business, reduced workforce morale, and difficulties in recruiting talent. Sustained reputational damage could have a materially negative impact on the Issuer's licence to operate and the value of the Issuer's franchise, which in turn could negatively affect the Issuer's profitability and financial condition.</p> <p>Infrastructure Resilience, Technology and Cyberspace risk: The Issuer is</p>

		<p>exposed to risks from cyberspace to its systems. If customer or proprietary information held on, and/or transactions processed through these systems, is breached, there could be a materially negative impact on the Issuer's performance or reputation.</p> <p>Taxation risk: The Issuer may suffer losses arising from additional tax charges, other financial costs or reputational damage due to: failure to comply with or correctly assess the application of, relevant tax law; failure to deal with tax authorities in a timely, transparent and effective manner; incorrect calculation of tax estimates for reported and forecast tax numbers; or provision of incorrect tax advice.</p>
D.6	<p>Risk warning that investors may lose value of entire investment or part of it</p>	<p>Investors in Securities may lose up to the entire value of their investment: Depending on the performance of the Underlying Assets, the redemption amount payable to investors (whether at maturity or following an early redemption) may be less than the initial purchase price and could be as low as zero. The investor is also exposed to the credit risk of the Issuer and will lose up to the entire value of their investment if the Issuer goes bankrupt or is otherwise unable to meet its payment obligations. Investors may also lose some or all of their investment if:</p> <ul style="list-style-type: none"> • investors sell their Securities prior to maturity in the secondary market at an amount that is less than the initial purchase price; • the Securities are redeemed early for reasons beyond the control of the Issuer (such as following a change in applicable law, a currency disruption event, an extraordinary market disruption, a tax event affecting the Issuer's ability to fulfil its obligations under the Securities, a Warrant Termination Event or the performance of the Issuer's obligations becoming unlawful) and the amount paid to investors is less than the initial purchase price; and/or • the terms and conditions of the Securities are adjusted (in accordance with the terms and conditions of the Securities) with the result that the redemption amount payable to investors and/or the value of the Securities is reduced. <p>Reinvestment risk / loss of yield: Following an early redemption of the Securities for any reason, investors may be unable to reinvest the redemption proceeds at an effective yield as high as the yield on the Securities being redeemed.</p> <p>Volatile market prices: the market value of the Securities is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; the Issuer's creditworthiness or perceived creditworthiness; and the performance of the relevant Underlying Asset(s).</p> <p>Securities are not "principal protected": Upon maturity of the Securities, investors may lose some or all of their capital invested, depending on the performance of the Underlying Asset(s).</p> <p>Securities include embedded derivatives that are subject to adjustment: The securities are linked to Underlying Asset(s) which are subject to provisions which provide for adjustments and modifications of their terms and alternative means of valuation of the Underlying Asset(s) in certain circumstances (and which could be exercised by the Issuer in a manner which has an adverse effect on the market value and/or amount repayable</p>

		<p>in respect of the Securities).</p> <p>Risks relating to Underlying Warrants: Investors are exposed to the change in value of the Underlying Warrant(s) which may fluctuate up or down depending on the performance of the Underlying Warrant Reference Asset(s). The performance of the Underlying Warrant Reference Assets may be subject to fluctuations that may not correlate with other similar reference assets. Payments upon redemption will be calculated by the change in value of the Underlying Warrant(s) since the Initial Valuation Date. Any information about the past performance of the Underlying Warrant(s) and/or the Underlying Warrant Reference Asset(s) should not be taken as an indication of how prices will change in the future. Investors in Securities linked to Underlying Warrants should also note that the market value of both the Securities and the Underlying Warrants will be affected by the ability, and the perceived ability, of Barclays to fulfil its obligations under the instruments. The impact of any inability, or perceived inability, of Barclays in this regard may be greater in respect of the Securities as the Securities are linked to Underlying Warrants that are issued by Barclays and it may negatively affect both the value of the Underlying Warrant and the value of the Security.</p> <p>Risks associated with specific Underlying Warrant Reference Asset(s):</p> <p>As the Underlying Warrant Reference Assets are equity indices, the Underlying Warrants may be subject to the risk of fluctuations in; market interest rates; currency exchange rates; equity prices; commodity prices; inflation; the value and volatility of the relevant equity index; and also to economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions, including factors affecting capital markets generally or the stock exchanges on which any such Underlying Warrants may be traded. This could have an adverse effect on the value of the Underlying Warrant which, in turn, will have an adverse effect on the value of the Securities.</p> <p>The capital invested in the Securities is at risk. Consequently, investors may lose the value of their entire investment, or part of it.</p>
