Section D – Risks																																																														
D.2	Key information on	Credit Risk: The Issuer is exposed to the risk of suffering loss if any of its customers, clients or market counterparties fails to fulfil its contractual obligations. The Issuer may also suffer loss																																																												

	<p>the key risks that are specific to the Issuer</p>	<p>where the downgrading of an entity's credit rating causes a fall in the value of the Issuer's investment in that entity's financial instruments.</p> <p>Weak or deteriorating economic conditions negatively impact these counterparty and credit-related risks. In recent times, the economic environment in the Issuer's main business markets (being Europe and the United States) have been marked by generally weaker than expected growth, increased unemployment, depressed housing prices, reduced business confidence, rising inflation and contracting GDP. Operations in the Eurozone remain affected by the ongoing sovereign debt crisis, the stresses being exerted on the financial system and the risk that one or more countries may exit the Euro. The current absence of a predetermined mechanism for a member state to exit the Euro means that it is not possible to predict the outcome of such an event and to accurately quantify the impact of such event on the Issuer's profitability, liquidity and capital. If some or all of these conditions persist or worsen, they may have a material adverse effect on the Issuer's operations, financial condition and prospects.</p> <p>Market risk: The Issuer may suffer financial loss if the Issuer is unable to adequately hedge its balance sheet. This could occur as a result of low market liquidity levels, or if there are unexpected or volatile changes in interest rates, credit spreads, commodity prices, equity prices and/or foreign exchange rates.</p> <p>Liquidity risk: The Issuer is exposed to the risk that it may be unable to meet its obligations as they fall due as a result of a sudden, and potentially protracted, increase in net cash outflows. These outflows could be principally through customer withdrawals, wholesale counterparties removing financing, collateral posting requirements or loan draw-downs.</p> <p>Capital risk: The Issuer may be unable to maintain appropriate capital ratios, which could lead to: (i) an inability to support business activity; (ii) a failure to meet regulatory requirements; and/or (iii) credit ratings downgrades. Increased regulatory capital requirements and changes to what constitutes capital may constrain the Issuer's planned activities and could increase costs and contribute to adverse impacts on the Issuer's earnings.</p> <p>Legal and Regulatory-related risk: Non-compliance by the Issuer with applicable laws, regulations and codes relevant to the financial services industry could lead to fines, public reprimands, damage to reputation, increased prudential requirements, enforced suspension of operations or, in extreme cases, withdrawal of authorisations to operate.</p> <p>Reputation Risk: Reputational damage reduces – directly or indirectly – the attractiveness of the Issuer to stakeholders and may lead to negative publicity, loss of revenue, litigation, regulatory or legislative action, loss of existing or potential client business, reduced workforce morale, and difficulties in recruiting talent. Sustained reputational damage could have a materially negative impact on our licence to operate and the value of the Issuer's franchise, which in turn could negatively affect the Issuer's profitability and financial condition.</p> <p>Infrastructure Resilience, Technology and Cyberspace risk: The Issuer is exposed to risks from cyberspace to its systems. If customer or proprietary information held on, and/or transactions processed through these systems, is breached, there could be a materially negative impact on the Issuer's performance or reputation.</p> <p>Taxation risk: The Issuer may suffer losses arising from additional tax charges, other financial costs or reputational damage due to: failure to comply with or correctly assess the application of, relevant tax law; failure to deal with tax authorities in a timely, transparent and effective manner; incorrect calculation of tax estimates for reported and forecast tax numbers; or provision of incorrect tax advice.</p>
D.3	<p>Key information on the key risks that are specific to the Securities</p>	<p>Investors in Securities may lose up to the entire value of their investment: Even if the relevant Securities are stated to be repayable at an amount that is equal to or greater than their initial purchase price, the investor is still exposed to the credit risk of the Issuer and will lose up to the entire value of their investment if the Issuer goes bankrupt or is otherwise unable to meet its payment obligations. Investors may also lose some or all of their investment if:</p> <ul style="list-style-type: none"> • investors sell their Securities prior to maturity in the secondary market at an amount that is less than the initial purchase price; • the Securities are redeemed early for reasons beyond the control of the Issuer (such as following a change in applicable law, a currency disruption or a tax event affecting the Issuer's ability to fulfil its obligations under the Securities) and the amount paid to investors is less than the initial purchase price; and/or • the terms and conditions of the Securities are adjusted (in accordance with the

		<p>terms and conditions of the Securities) with the result that the redemption amount payable to investors and/or the value of the Securities is reduced.</p> <p>Reinvestment risk/loss of yield: Following an early redemption of the Securities for any reason, investors may be unable to reinvest the redemption proceeds at an effective yield as high as the yield on the Securities being redeemed.</p> <p>Volatile market prices: the market value of the Securities is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p>
Section E – Offer		
E.4	Description of any interest material to the issue/offer, including conflicting interests	<p>The relevant dealers or Manager may be paid fees in relation to any issue or offer of Securities. Potential conflicts of interest may exist between the Issuer, Determination Agent, relevant dealers and/or Manager or their affiliates (who may have interests in transactions in derivatives related to the Underlying Asset(s) which may, but are not intended to, adversely affect the market price, liquidity or value of the Securities) and investors.</p> <p>Not Applicable; no person involved in the issue or offer has any interest, or conflicting interest, that is material to the issue or offer of Securities.</p>
E.7	Estimated expenses charged to investor by issuer/offeror	<p>The Issuer will not charge any expenses to investors in connection with any issue of Securities. Offerors may, however, charge expenses to investors. Such expenses (if any) will be determined by agreement between the offeror and the investors at the time of each issue.</p> <p>Not applicable; no expenses will be charged to the investor by the issuer or the offeror.</p>
