Any decision to invest in Warrants should be based on consideration of the Base Prospectus as a whole, including any information incorporated by reference, and read together with the Final Terms.</p> <p>Where a claim relating to the information contained in the Base Prospectus is brought before a court, the plaintiff might, under the national legislation of the relevant Member State of the European Economic Area, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated.</p> <p>No civil liability shall attach to any responsible person solely on the basis of this Summary, including any translation thereof, unless it is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus or it does not provide, when read together with the other parts of the Base Prospectus, key information in order to aid holders when considering whether to invest in the Warrants.</p>
A.2	Consent by the Issuer to the use of prospectus in subsequent resale or final placement of Warrants	Not Applicable: the Issuer does not consent to the use of the Base Prospectus or the Final Terms by any other party for subsequent resale or final placement of the Warrants.

If the Settlement Value is not greater than the Exercise Price, the Warrants will be cancelled without exercise on the Exercise Date and no amount or entitlement will be payable or deliverable to investors.</p> <p>The Exercise Price for this issue of Warrants is GBP 2,500.</p> <p>The Settlement Value impacts the amount which is payable or the entitlement which is deliverable upon exercise. The Settlement Value will be calculated as the Exercise Price plus an amount dependent on the price or level of the Underlying Asset on one or more specified dates during the life of the Warrants. In particular, the Settlement Value will depend on the following:</p> <ul style="list-style-type: none"> • the Exercise Price, being GBP 2,500; • the 'Initial Price' of the Underlying Asset, which reflects the price or level of the Underlying Asset on the Initial Valuation Date of the Warrants (being 7 February 2018) and is used as the reference point for determining the performance of any investment; • the 'Final Valuation Price' of the Underlying Asset, which reflects the price or level of the Underlying Asset on or near the Exercise Date; • the 'Strike Price' of the Underlying Asset, which is calculated as 100.00% multiplied by the Initial Price of the Underlying Asset;

	<ul style="list-style-type: none"> • the 'Final Barrier' of the Underlying Asset, which is calculated as 100.00% multiplied by the Initial Price of the Underlying Asset; and • the 'Knock-in Barrier Price' of the Underlying Asset, which is calculated as 50.00% multiplied by the Initial Price of the Underlying Asset. <p>Initial Price: The Initial Price of the Underlying Asset is 7,279.42 and is the closing price or level of the Underlying Asset on 7 February 2018.</p> <p>Final Valuation Price: The Final Valuation Price of the Underlying Asset is the closing price or level of the Underlying Asset on 7 February 2024.</p> <p>Calculation of the Settlement Value</p> <p>There are several threshold levels which will affect the calculation of the Settlement Value. In particular, the Settlement Value will be calculated differently depending on whether or not the price or level of the Underlying Asset on certain dates is equal to, above or below certain specified threshold levels. In other words, the Settlement Value will be calculated differently depending on whether or not the performance of the Underlying Asset satisfies certain 'threshold tests'.</p> <p><i>The first threshold test</i> for this issue of Warrants is whether:</p> <p>The Final Valuation Price is greater than or equal to the Final Barrier.</p> <p><i>If the first threshold test is satisfied</i>, the Settlement Value will be calculated as follows:</p> <p>Settlement Value = (i) the Exercise Price (being GBP 2,500), plus (ii) the Final Autocall Settlement Percentage (being 164.56%) multiplied by the Calculation Amount (being GBP 25,000).</p> <p><i>If the first threshold test is not satisfied</i>, a second threshold test will be considered:</p> <p><i>The second threshold test</i> for this issue of Warrants is whether:</p> <p>The Final Valuation Price is greater than or equal to the Knock-in Barrier Price.</p> <p><i>If the second threshold test is satisfied</i>, the Settlement Value will be calculated as follows:</p> <p>Settlement Value = (i) the Exercise Price (being GBP 2,500), plus (ii) 100% multiplied by the Calculation Amount (being GBP 25,000).</p> <p><i>If the second threshold test is <u>not</u> satisfied</i>, the Settlement Value will instead be calculated as follows:</p> <p>Settlement Value = (i) the Exercise Price (being GBP 2,500), plus (ii) the Final Valuation Price divided by the Strike Price and then multiplied by the Calculation Amount (being GBP 25,000).</p> <p>Settlement</p>
--	---

Following exercise of the Warrants and provided that all conditions to settlement have been fulfilled by investors (including payment of any Exercise Price), investors will receive, per Calculation Amount:

a cash amount per Calculation Amount equal to the Settlement Value payable on 14 February 2024.

Early cancellation following an autocall event:

If the closing price or level of every Underlying Asset is greater than or equal to its corresponding Autocall Barrier on any Autocall Valuation Date, the Warrants will be automatically cancelled prior to the Exercise Date and each investor will receive (per Calculation Amount):

a cash amount equal to the Autocall Early Cash Settlement Percentage as specified in the table below multiplied by the Calculation Amount (being GBP 25,000), payable on the relevant Autocall Early Cancellation Date.

The 'Autocall Barrier' of the Underlying Asset is calculated as the Autocall Barrier Percentage specified in the table below multiplied by the Initial Price of such Underlying Asset.

Each Autocall Valuation Date and the corresponding Autocall Early Cancellation Date, Autocall Barrier Percentage and Autocall Early Cash Settlement Percentage is specified in the table below:

Autocall Valuation Date	Autocall Early Cancellation Date	Autocall Barrier Percentage	Autocall Early Cash Settlement Percentage

Section D – Risks		
D.2	Key information on the key risks that are specific to the Issuer	<p>Principal Risks relating to the Issuer: Material risks and their impact are described below in two sections: (i) Material existing and emerging risks by Principal Risk and (ii) Material existing and emerging risks potentially impacting more than one Principal Risk. A revised Enterprise Risk Management Framework ("ERMF") was approved by the board in December 2016 and revises the eight risks as follows: (1) Credit Risk; (2) Market Risk; (3) Treasury and Capital Risk; (4) Operational Risk; (5) Model Risk; (6) Conduct Risk; (7) Reputation Risk; and (8) Legal Risk (each a "Principal Risk").</p> <p>(i) Material existing and emerging risks by Principal Risk:</p> <p>Credit risk: The risk of loss to the firm from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the firm, including the whole and timely payment of principal, interest, collateral and other receivables. The Group may suffer financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group. The Group may also suffer loss when the value of its investment in the financial instruments of an entity falls as a result of that entity's credit rating being downgraded. In addition, the Group may incur significant unrealised gains or losses due to changes in the Group's credit spreads or those of third parties, as these changes affect the fair value of the Group's derivative instruments, debt securities that the Group holds or issues, and loans held at fair value.</p> <p>Market risk: The risk of loss arising from potential adverse changes in the value of the firm's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, commodity prices, credit spreads, implied volatilities and asset correlations. The Group's trading business is generally adversely exposed to a prolonged period of elevated asset price volatility, particularly if it negatively affects the depth of marketplace liquidity.</p> <p>Treasury and capital risk: The ability of the Group to achieve its business plans may be adversely impacted due to availability of planned liquidity, a shortfall in capital or a mismatch in the interest rate exposures of its assets and liabilities. The Group may not be able to achieve its business plans due to: i) being unable to maintain appropriate capital ratios; ii) being unable to meet its obligations as they fall due; iii) rating agency downgrades; iv) adverse changes in foreign exchange rates on capital ratios; v) negative interest rates; and vi) adverse movements in the pension fund.</p>

		<p>Operational risk: The risk of loss to the firm from inadequate or failed processes or systems, human factors or due to external events (for example fraud) where the root cause is not due to credit or market risks. The Group is exposed to many types of operational risk. These include: fraudulent and other internal and external criminal activities; breakdowns in processes, controls or procedures (or their inadequacy relative to the size and scope of the Group's business); systems failures or an attempt by an external party to make a service or supporting technological infrastructure unavailable to its intended users, known as a denial of service attack; and the risk of geopolitical cyber threat activity which destabilises or destroys the Group's information technology, or critical technological infrastructure the Group depends upon but does not control. The Group is also subject to the risk of business disruption arising from events wholly or partially beyond its control, for example natural disasters, acts of terrorism, epidemics and transport or utility failures, which may give rise to losses or reductions in service to customers and/or economic loss to the Group. All of these risks are also applicable where the Group relies on outside suppliers or vendors to provide services to it and its customers. The operational risks that the Group is exposed to could change rapidly and there is no guarantee that the Group's processes, controls, procedures and systems are sufficient to address, or could adapt promptly to, such changing risks to avoid the risk of loss.</p> <p>Model risk: The Group uses models to support a broad range of business and risk management activities. Models are imperfect and incomplete representations of reality, and so they may be subject to errors affecting the accuracy of their outputs. Models may also be misused. Model errors or misuse may result in the Group making inappropriate business decisions and being subject to financial loss, regulatory risk, reputational risk and/or inadequate capital reporting.</p> <p>Conduct risk: The risk of detriment to customers, clients, market integrity, competition or the Group from the inappropriate supply of financial services, including instances of wilful or negligent misconduct. The Group is committed to ensuring that positive customer and client outcomes and protecting market integrity are integral to the way the Group operates. This includes taking reasonable steps to ensure the Group's culture and strategy are appropriately aligned to the objective that: the Group's products and services are reasonably designed and delivered to meet the needs of the Group's customers and clients. The Group has identified six main conduct risks, associated with: (i) the execution of strategic divestment in non-core businesses, (ii) product governance and sales practices, (iii) trading controls and benchmark submissions, (iv) the management of financial crime, (v) data protection and privacy, and (vi) regulatory focus on culture and accountability. Certain other risks may result in detriment to customers, clients and market integrity if not managed effectively. These include but are not limited to: cyber risk; infrastructure and technology resilience; ability to hire and retain qualified people; outsourcing; data quality; operational precision and payments; regulatory change; structural reform; change and execution risk; and the exit of</p>

		<p>the UK from the EU.</p> <p>Reputation risk: The risk that an action, transaction, investment or event will reduce trust in the firm's integrity and competence by clients, counterparties, investors, regulators, employees or the public.</p> <p>Legal risk: Legal disputes, regulatory investigations, fines and other sanctions relating to conduct of business and financial crime may negatively affect the Group's results, reputation and ability to conduct its business.</p> <p>(ii) Material existing and emerging risks potentially impacting more than one Principal Risk:</p> <p>Structural Reform (emerging risk):</p> <p>The UK Financial Services (Banking Reform) Act 2013 (The UK Banking Reform Act) and associated secondary legislation and regulatory rules require all UK deposit-taking banks with over £25 billion of deposits (from individuals and small businesses) to separate certain day-to-day banking activities (e.g. deposit-taking) offered to retail and smaller business customers from other wholesale and investment banking services.</p> <p>Business conditions, general economy and geopolitical issues:</p> <p>The Group's performance could be adversely affected in relation to more than one Principal Risk by a weak or deteriorating global economy or political instability. These factors may also occur in one or more of the Group's main countries of operation. The Group offers a broad range of services to retail, institutional and government customers, in a large number of countries. The breadth of these operations means that deterioration in the economic environment, or an increase in political instability in countries where it is active, or any other systemically important economy, could adversely affect the Group's performance and prospects.</p> <p>Change and execution:</p> <p>The Group continues to drive changes to its functional capabilities and operating environment in order to allow the business to exploit emerging and digital technologies, and improve customer experience whilst also embedding enhanced regulatory requirements, strategic realignment, and business model changes. The complexity, increasing pace, and volume of changes underway simultaneously mean there is heightened execution risk and potential for change not being delivered to plan. Failure to adequately manage this risk could result in extended outages and disruption, financial loss, customer detriment, legal liability, potential regulatory censure and reputational damage.</p> <p>Risks arising from regulation of the financial services industry:</p> <p>The financial services industry continues to be the focus of significant regulatory change and scrutiny which may</p>

		<p>adversely affect the Group's business, financial performance, capital and risk management strategies.</p> <p>Regulatory action in the event a bank in the Group (such as the Issuer) is failing or likely to fail could materially adversely affect the value of the Warrants:</p> <p>UK resolution authorities have the right under certain circumstances to intervene in the Group pursuant to the stabilisation and resolution powers granted to them under the Banking Act and other applicable legislation. The exercise of any of these actions in relation to the Issuer could materially adversely affect the value of the Securities.</p> <p>EU referendum:</p> <p>The UK held a referendum on 23 June 2016 on whether it should remain a member of the EU. This resulted in a vote in favour of leaving the EU. The result of the referendum means that the long-term nature of the UK's relationship with the EU is unclear and there is uncertainty as to the nature and timing of any agreement with the EU on the terms of exit. In the interim, there is a risk of uncertainty for both the UK and the EU, which could adversely affect the economy of the UK and the other economies in which the Group operates.</p> <p>Under the terms of the Warrants, investors have agreed to be bound by the exercise of any UK Bail-in Power by the relevant UK resolution authority.</p> <p>Impairment:</p> <p>The introduction of the impairment requirements of IFRS 9 Financial Instruments, due to be implemented on 1 January 2018, is expected to result in higher impairment loss allowances that are recognised earlier, on a more forward looking basis and on a broader scope of financial instruments than is the case under IAS 39. Measurement will involve increased complexity, judgement and is expected to have a material financial impact and impairment charges will tend to be more volatile. Unsecured products with longer expected lives, such as revolving credit cards, are expected to be most impacted. The capital treatment on the increased reserves is the subject of ongoing discussion with regulators and across the industry, but there is potential for significant adverse impact on regulatory capital ratios. In addition, the move from incurred to expected credit losses has the potential to impact the Group's performance under stressed economic conditions or regulatory stress tests.</p> <p>A downgrade of the credit rating assigned by any credit rating agency to the Issuer could adversely affect the liquidity or market value of the Warrants. Credit ratings downgrade could occur as a result of, among other causes, changes in the ratings methodologies used by credit rating agencies. Changes in credit rating agencies' views of the level of implicit sovereign support for European banks and their groups are likely to lead to credit ratings downgrades.</p> <p>The Issuer is affected by risks affecting the Bank Group:</p> <p>The Issuer is also affected by risks affecting the Bank Group</p>

		<p>as there is substantial overlap in the businesses of the Issuer and its subsidiaries. Further, the Issuer can be negatively affected by risks and other events affecting its subsidiaries even where the Issuer is not directly affected.</p>
D.6	<p>Key information on the key risks that are specific to the Warrants and risk warning that investors may lose some or all of the value of their investment</p>	<p>You may lose up to the entire value of your investment if the Issuer fails or is otherwise unable to meet its payment or delivery obligations.</p> <p>The terms of the Warrants do not provide for scheduled minimum payment of the face value or issue price of the Warrants on exercise or following any early cancellation: depending on the performance of the Underlying Asset(s), you may lose some or all of your investment.</p> <p>The payment of any amount or delivery of any property due under the Warrants is dependent upon the Issuer's ability to fulfil its obligations when they fall due. The Warrants are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any other deposit protection insurance scheme. Therefore, if the Issuer fails or is otherwise unable to meet its payment or delivery obligations under the Warrants, you will lose some or all of your investment.</p> <p>You may also lose the value of your investment if:</p> <ul style="list-style-type: none"> • the Underlying Asset(s) perform in such a manner that the settlement amount or entitlement payable or deliverable to you (whether at exercise or following any early cancellation, and including after deduction of any applicable taxes and expenses) is less than the initial purchase price and could be as low as zero; • you sell your Warrants prior to scheduled exercise in the secondary market (if any) at an amount that is less than the initial purchase price; • the Warrants are cancelled early following the occurrence of an extraordinary event in relation to the Underlying Asset, the Issuer, the Issuer's hedging arrangement, the relevant currencies or taxation (such as following an additional disruption event) and the amount you receive on such early cancellation is less than the initial purchase price; and/or • the terms and conditions of the Warrants are adjusted (in accordance with the terms and conditions of the Warrants) with the result that the settlement amount payable to you and/or the value of the Warrants is reduced. <p>Return linked to performance of one or more Underlying Assets: The return on the Warrants is linked to the change in value of the Underlying Asset(s) over the life of the Warrants. Any information about the past performance of the Underlying Asset(s) should not be taken as an indication of how prices will change in the future. You will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of the Underlying Asset(s).</p> <p>Conditions to settlement: Payment of any settlement amount or delivery of any settlement entitlement is subject to satisfaction of all</p>

		<p>conditions to settlement by you, including payment of any Exercise Price and/or taxes due with respect to the Warrants. If you fail to comply with these conditions, the obligations of the Issuer to you may be discharged without any payment or delivery being made.</p> <p>Reinvestment risk/loss of yield: Following an early cancellation of the Warrants for any reason, holders may be unable to reinvest the cancellation proceeds at a rate of return as high as the return on the Warrants being cancelled.</p> <p>US withholding on dividend equivalent amounts: certain deemed payments on the product held by non-US investors generally may be subject to a US withholding tax of 30 per cent. No additional amounts will be payable in respect of such withholding taxes.</p> <p>Equity Index risks: Warrants linked to the performance of equity indices provide investment diversification opportunities, but will be subject to the risk of fluctuations in both equity prices and the value and volatility of the relevant equity index. Warrants linked to equity indices may not participate in dividends or any other distributions paid on the shares which make up such indices, accordingly, you may receive a lower return on the Warrants than you would have received if you had invested directly in those shares.</p> <p>The index sponsor can add, delete or substitute the components of an equity index at its discretion, and may also alter the methodology used to calculate the level of such index. These events may have a detrimental impact on the level of that index, which in turn could have a negative impact on the value of and return on the Warrants.</p> <p>Volatile market prices: The market value of the Warrants is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Warrants are scheduled to exercise; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p>
Section E – Offer		
E.2b	Reasons for offer and use of proceeds when different from making profit and/or hedging certain risks	<p>The net proceeds from each issue of Warrants will be applied by the Issuer for its general corporate purposes, which include making a profit and/or hedging certain risks. If the Issuer elects at the time of issuance of Warrants to make different or more specific use of proceeds, such use will be described in the Final Terms and summarised below.</p> <p>Not Applicable: the net proceeds will be applied by the Issuer for making profit and/or hedging certain risks.</p>
E.3	Description of the terms and conditions of the offer	The Warrants will be offered to the dealer at the Issue Price and will not be offered to the public.
E.4	Description of any interest material to the issue/offer, including conflicting interests	The Manager and its affiliates may be engaged, and may in the future engage, in hedging transactions with respect to the Underlying Asset.

E.7	Estimated expenses charged to investor by the Issuer	The Issuer will not charge any expenses to holders in connection with any issue of Warrants. Not Applicable: no expenses will be charged to the holder by the Issuer or the offeror.
