The Securities of each Series are intended to be interchangeable with all other Securities of that Series. Settlement procedures will depend on the clearing system for the Securities and local practices in the jurisdiction of the investor.</p> <p>Optional Early Redemption: Certain Securities may be redeemed earlier than the Scheduled Redemption Date following the exercise of a call option by the Issuer or the exercise of a put option by a Holder of the Securities.</p> <p>Mandatory Early Redemption: Securities may also be redeemed earlier than the Scheduled Redemption Date if performance of the Issuer's obligations becomes illegal, if the Determination Agent so determines, following cessation of publication of an inflation index, or following the occurrence of a change in applicable law, a currency disruption or a tax event affecting the Issuer's ability to fulfil its obligation under the Securities.</p> <p>Indicative amounts: If the Securities are being offered by way of a Public Offer and any specified product values below are not fixed or determined at the commencement of the Public Offer (including any amount, level, percentage, price, rate or other value in relation to the terms of the Securities which has not been fixed or determined by the commencement of the Public Offer), these specified product values will specify an indicative amount, an indicative minimum amount, an indicative maximum amount or any combination thereof. A revised Enterprise Risk Management Framework ("ERMF") was approved by the board of the Issuer in December 2016 and revises the eight risks as follows: (1) Credit Risk of the Issuer; (2) Market Risk; (3) Treasury and Capital Risk; (4) Operational Risk; (5) Model Risk; (6) Conduct Risk; (7) Reputation Risk; and (8) Legal Risk (each a "Principal Risk").</p> <p>(i) Material existing and emerging risks by Principal Risk:</p> <p>Credit risk: The risk of loss to the Group from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the Group, including the whole and timely payment of principal, interest, collateral and other receivables. The Group may suffer financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group. The Group may also suffer loss when the value of its investment in the financial instruments of an entity falls as a result of that entity's credit rating being downgraded. In addition, the Group may incur significant unrealised gains or losses due to changes in the Group's credit spreads or those of third parties, as these changes affect the fair value of the Group's derivative instruments, debt securities that the Group holds or issues, and loans held at fair value.</p> <p>Market risk: The risk of loss arising from potential adverse changes in the value of the Group's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, credit spreads, implied volatilities and asset correlations. The Group's trading business is generally adversely exposed to a prolonged period of elevated asset price volatility, particularly if it negatively affects the depth of marketplace liquidity.</p> <p>Treasury and capital risk: The ability of the Group to achieve its business plans may be adversely impacted due to availability of planned liquidity, a shortfall in capital or a mismatch in the interest rate exposures of its assets and liabilities. The Group may not be able to achieve its business plans due to: (i) being unable to maintain appropriate capital ratios; (ii) being unable to meet its obligations as they fall due; (iii) rating agency downgrades; (iv) adverse changes in foreign exchange rates on capital ratios; (v) negative interest rates; and (vi) adverse movements in the pension fund.</p> <p>Operational risk: The risk of loss to the Group from inadequate or failed processes or systems, human factors or due to external events (for example fraud) where the root cause is not due to credit or market risks. The Group is exposed to many types of operational risk. These include: fraudulent and other internal and external criminal activities; breakdowns in processes, controls or procedures (or their inadequacy relative to the size and scope of the Group's business); systems failures or an attempt by an external party to make a service or supporting technological infrastructure unavailable to its intended users, known as a denial of service attack and the risk of geopolitical cyber threat activity which destabilises or destroys the Group's information technology, or critical technological infrastructure the Group depends upon but does not</p>

	<p>control. The Group is also subject to the risk of business disruption arising from events wholly or partially beyond its control, for example natural disasters, acts of terrorism, epidemics and transport or utility failures, which may give rise to losses or reductions in service to customers and/or economic loss to the Group. All of these risks are also applicable where the Group relies on outside suppliers or vendors to provide services to it and its customers. The operational risks that the Group is exposed to could change rapidly and there is no guarantee that the Group's processes, controls, procedures and systems are sufficient to address, or could adapt promptly to, such changing risks to avoid the risk of loss.</p> <p>Model risk: The Group uses models to support a broad range of business and risk management activities. Models are imperfect and incomplete representations of reality, and so they may be subject to errors affecting the accuracy of their outputs. Models may also be misused. Model errors or misuse may result in the Group making inappropriate business decisions and being subject to financial loss, regulatory risk, reputational risk and/or inadequate capital reporting.</p> <p>Conduct risk: The risk of detriment to customers, clients, market integrity, competition or the Group from the inappropriate supply of financial services, including instances of wilful or negligent misconduct. The Group is committed to ensuring that positive customer and client outcomes and protecting market integrity are integral to the way the Group operates. This includes taking reasonable steps to ensure the Group's culture and strategy are appropriately aligned to the objective that: the Group's products and services are reasonably designed and delivered to meet the needs of the Group's customers and clients. The Group has identified six main conduct risks, associated with: (i) the execution of strategic divestment in non-core businesses, (ii) product governance and sales practices, (iii) trading controls and benchmark submissions, (iv) the management of financial crime, (v) data protection and privacy, and (vi) regulatory focus on culture and accountability. Certain other risks may result in detriment to customers, clients and market integrity if not managed effectively. These include but are not limited to: cyber risk; infrastructure and technology resilience; ability to hire and retain qualified people; outsourcing; data quality; operational precision and payments; regulatory change; structural reform; change and execution risk; and the exit of the UK from the EU.</p> <p>Reputation risk: The risk that an action, transaction, investment or event will reduce trust in the Group's integrity and competence by clients, counterparties, investors, regulators, employees or the public.</p> <p>Legal risk: Legal disputes, regulatory investigations, fines and other sanctions relating to conduct of business and financial crime may negatively affect the Group's results, reputation and ability to conduct its business.</p> <p>(ii) Material existing and emerging risks potentially impacting more than one Principal Risk:</p> <p>Structural Reform (emerging risk):</p> <p>The UK Financial Services (Banking Reform) Act 2013 (The UK Banking Reform Act) and associated secondary legislation and regulatory rules require all UK deposit-taking banks with over £25 billion of deposits (from individuals and small businesses) to separate certain day-to-day banking activities (e.g. deposit-taking) offered to retail and smaller business customers from other wholesale and investment banking services.</p> <p>Business conditions, general economy and geopolitical issues:</p> <p>The Group's performance could be adversely affected in relation to more than</p>

	<p>one Principal Risk by a weak or deteriorating global economy or political instability. These factors may also occur in one or more of the Group's main countries of operation. The Group offers a broad range of services to retail, institutional and government customers, in a large number of countries. The breadth of these operations means that deterioration in the economic environment, or an increase in political instability in countries where it is active, or any other systemically important economy, could adversely affect the Group's performance and prospects.</p> <p>Change and execution:</p> <p>The Group continues to drive changes to its functional capabilities and operating environment in order to allow the business to exploit emerging and digital technologies, and improve customer experience whilst also embedding enhanced regulatory requirements, strategic realignment, and business model changes. The complexity, increasing pace, and volume of changes underway simultaneously mean there is heightened execution risk and potential for change not being delivered to plan. Failure to adequately manage this risk could result in extended outages and disruption, financial loss, customer detriment, legal liability, potential regulatory censure and reputational damage.</p> <p>Risks arising from regulation of the financial services industry:</p> <p>The financial services industry continues to be the focus of significant regulatory change and scrutiny which may adversely affect the Group's business, financial performance, capital and risk management strategies.</p> <p>Regulatory action in the event a bank in the Group (such as the Issuer) is failing or likely to fail:</p> <p>UK resolution authorities have the right under certain circumstances to intervene in the Group pursuant to the stabilisation and resolution powers granted to them under the Banking Act and other applicable legislation. The exercise of any of these actions in relation to the Issuer could materially adversely affect the value of the Securities.</p> <p>Under the terms of the Securities, investors have agreed to be bound by the exercise of any UK Bail-in Power by the relevant UK resolution authority.</p> <p>EU referendum:</p> <p>The UK held a referendum on 23 June 2016 on whether it should remain a member of the EU. This resulted in a vote in favour of leaving the EU. The result of the referendum means that the long-term nature of the UK's relationship with the EU is unclear and there is uncertainty as to the nature and timing of any agreement with the EU on the terms of exit. In the interim, there is a risk of uncertainty for both the UK and the EU, which could adversely affect the economy of the UK and the other economies in which the Group operates.</p> <p>Impairment:</p> <p>The introduction of the impairment requirements of IFRS 9 Financial Instruments, due to be implemented on 1 January 2018, is expected to result in higher impairment loss allowances that are recognised earlier, on a more forward looking basis and on a broader scope of financial instruments than is the case under IAS 39. Measurement will involve increased complexity, judgement and is expected to have a material financial impact and impairment charges will tend to be more volatile. Unsecured products with longer expected lives, such as revolving credit cards, are expected to be most impacted. The capital treatment on the increased reserves is the subject of ongoing discussion with regulators and across the industry, but there is potential for significant</p>

		<p>adverse impact on regulatory capital ratios. In addition, the move from incurred to expected credit losses has the potential to impact the Group's performance under stressed economic conditions or regulatory stress tests.</p> <p>A downgrade of the credit rating assigned by any credit rating agency to the Issuer could adversely affect the liquidity or market value of the Securities. Credit ratings downgrade could occur as a result of, among other causes, changes in the ratings methodologies used by credit rating agencies. Changes in credit rating agencies' views of the level of implicit sovereign support for European banks and their groups are likely to lead to credit ratings downgrades.</p> <p>The Issuer is affected by risks affecting the Bank Group:</p> <p>The Issuer is also affected by risks affecting the Bank Group as there is substantial overlap in the businesses of the Issuer and its subsidiaries. Further, the Issuer can be negatively affected by risks and other events affecting its subsidiaries even where the Issuer is not directly affected.</p>
D.3	<p>Key information on the key risks that are specific to the Securities</p>	<p>You may lose up to the entire value of your investment in the Securities:</p> <p>The payment of any amount due under the Securities is dependent upon the Issuer's ability to fulfil its obligations when they fall due. The Securities are unsecured obligations. They are not deposits and they are not protected under the UK's Financial Services Compensation Scheme or any other deposit protection insurance scheme. Therefore, even if the relevant Securities are stated to be repayable at an amount that is equal to or greater than their initial purchase price, if the Issuer fails or is otherwise unable to meet its payment or delivery obligations under the Securities, you will lose some or all of your investment.</p> <p>You may also lose some or all of your entire investment if:</p> <ul style="list-style-type: none"> • you sell your Securities prior to maturity in the secondary market (if any) at an amount that is less than the initial purchase price; • the Securities are redeemed early for reasons beyond the control of the Issuer (such as following a change in applicable law, a currency disruption or a tax event affecting the Issuer's ability to fulfil its obligations under the Securities) and the amount paid to investors is less than the initial purchase price; or • the terms and conditions of the Securities are adjusted (in accordance with the terms and conditions of the Securities) with the result that the redemption amount payable to investors and/or the value of the Securities is reduced. <p>Reinvestment risk/loss of yield: Following an early redemption of the Securities for any reason, Holders may be unable to reinvest the redemption proceeds at a rate of return as high as the return on the Securities being redeemed.</p> <p>Volatile market prices: The market value of the Securities is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p> <p>Risks relating to Floating Rates: The performance of floating interest rates is dependent upon a number of factors, including supply and demand on the international money markets, which are influenced by measures taken by</p>

		governments and central banks, as well as speculations and other macroeconomic factors.
D.6	Risk warning that investors may lose value of entire investment or part of it	The capital invested in the Securities is at risk. Consequently, you may lose the value of your entire investment, or part of it.
